

Diners Club^{®†} Global Vision^{®†}

Gain spend visibility for your business with Global Vision

Monitor, measure, control and leverage travel and entertainment spending with Global Vision, an integral part of the Diners Club Global Business Expense Management Solutions.

Global Vision is a simple, easy-to-use online tool for generating detailed reports on spending activity, policy compliance, delinquencies and more. All of your travel and entertainment spending data is securely stored in a single centralized data warehouse and is accessible anytime, from anywhere.

Report options

Global Vision offers three ways to generate reports using data collected from your corporate card program.

- Create reports using one of 21 standard report builders and 3 ad hoc report builders and use them for:
 - vendor analysis
 - compliance and policy reporting
 - account analysis
 - account balance trending
 - account inquiry
 - cash advance analysis
- Choose from more than 50 report templates and simply create a report title and enter the time period you want to examine.
- Analyze situations unique to your organization and its specific data by creating ad hoc reports using more than 500 different data elements — results can be ready in a matter of minutes.

Report flexibility

- Create reports to your specifications using names, labels, legends and date formats that are meaningful to your organization.

- Choose from 10 different reporting currencies for aggregating and analyzing data from around the world.
- View data by country in more than 150 local currencies.
- Organize information in ways that are relevant to your organization. Global Vision allows you to establish preferred vendor lists and to immediately identify expenditures with non-preferred vendors.
- Review and share report data and information within your organization using standard business software formats such as Excel, Word, pdf, Lotus or XML. You can also run reports in CSV format for export to other database applications.
- Report formats that you create can be saved for future use or revision.

Report schedules

Bring discipline and structure to card program reporting by scheduling Global Vision to automatically run your reports when you need them. They can be scheduled to run daily, weekly or monthly, and Global Vision delivers them on time, notifying you with an email when a report is waiting.
